

Biogeochemistry, Environmental Science, and Sustainability (BESS) Fall 2018 Seminar Series

Friday afternoons - 4PM - Morison Room, (A106), Corson Hall
Beverages and snacks provided after seminar

- September 7** Welcome Back Reception!
- September 14** Tracing carbon flows through Arctic and alpine watersheds
Laurel Lynch – Soil and Crop Sciences – Cornell University (lml262)
- September 21** Ecohydrology of subsurface environments: Collaborations in research, art, and communication
Zion Klos, Marist College (Katie Grant, keg89)
- September 28** Considering microbial physiology in understanding and modeling soil C cycling
Ashish Malik, University of California - Irvine (Roland Wilhelm, rcw239)
- October 5** Fall Break – NO SEMINAR
- October 12** TBA
- October 19** Phenology of carbon export by rivers under a changing climate
Steve Petsch, University of Massachusetts Amherst (Katie Grant, keg89)
- October 26** Reducing the greenhouse gas footprint of Amazon hydropower with optimized dam planning
Rafael Almeida – EEB – Cornell University (rma253)
- November 2** Stick around – The role of bacterial surface adhesion in soil formation, carbon cycling, and soil health
Roland Wilhelm – Soil and Crop Sciences – Cornell University (rcw239)
- November 9** SciComm for scientists: Translating research for the broader public
Liz Wason, University of Michigan (Susan Cheng, sjc265)
- November 16** Managing for multifunctionality: Insights on carbon and nitrogen dynamics in agroecosystems
Jennifer Blesh, University of Michigan (Erin Menzies, egm55)

Open to anyone – including all graduate students
